## Section 14

### Income, Expenditures, and Wealth

This section presents data on gross national product (GNP), rates of economic growth, per capita income, national and personal income, saving and investment, money income, poverty, national and personal wealth, and fixed business capital. The data on income and expenditure measure two aspects of the U.S. economy. One aspect relates to the national income and product accounts (NIPA), a summation reflecting the entire complex of the Nation's economic activities and the interaction of its major components; the other relates to the distribution of money income to families and individuals, or consumer income.

The primary source for data on GNP, national and personal income, gross savings and investment, and business capital is the *Survey of Current Business*, published monthly, with supplements, by the Department of Commerce, Bureau of Economic Analysis (BEA). Detailed historical data and a discussion of the conceptual framework of NIPA and of the statistical sources and methods used to derive the estimates appear in *The National Income and Product Accounts of the United States, 1929-74*, a Supplement to the *Survey of Current Business*, January 1976.

Sources of income distribution data are the decennial censuses of population and the Current Population Survey, both products of the Bureau of the Census (see text, page 1). Annual data on income of families, individuals, and households, by income class, are presented in *Current Population Reports—Consumer Income*, series P-60.

Data on individuals' saving and assets are published by the Board of Governors of the Federal Reserve System in the quarterly *Flow of Funds Accounts*; and detailed information on personal wealth is published periodically by the Internal Revenue Service in *Statistics of Income, Supplemental Report, Personal Wealth*.

**National income and product.**—*Gross national product* (GNP) is the total national output of goods and services valued at market prices. GNP can be viewed in terms of expenditure categories. These categories comprise purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. There are a number of inclusions, however, which represent imputed values (estimates of "income in kind"), the most important of which is the rental value of owner-occupied dwellings. GNP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation and for indirect taxes (such as sales and excise taxes); see table 716. *Gross domestic product* is GNP minus gross product originating outside the U.S.

*National income* is the aggregate of labor and property earnings which arise in the current production of goods and services by the Nation's economy. It is the sum of employee compensation, proprietors' income, rental income, net interest, and corporate profits. Thus, it measures the total factor costs of the goods and services produced by the economy. Earnings include direct taxes on earnings.

*Capital consumption adjustment* for corporations and nonfarm sole proprietorships and partnerships is the difference between capital consumption (i.e. depreciation charges and accidental damage to fixed business capital) claimed on income tax returns and capital consumption allowances that are measured at straightline depreciation, consistent service lives, and replacement cost. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. *Inventory valuation adjustment* represents the difference

between the book value of inventories used up in production and the cost of replacing them.

*Personal income* is the current income received by persons from all sources minus contributions for social insurance. Not only individuals (including owners of unincorporated enterprises), but nonprofit institutions, private trust funds, and private health and welfare funds are classed as "persons." Personal income includes transfers (payments not resulting from current production) from government and business such as social security benefits, military pensions, etc., but excludes transfers among persons. Although most of the income is in monetary form, there are important nonmonetary inclusions—chiefly, estimated net rental value to owner-occupants of their homes, the value of services furnished without payment by financial intermediaries, and the value of food consumed on farms.

*Disposable personal income* is personal income less personal tax and nontax payments. It is the income available to persons for spending and saving. Personal tax and nontax payments are tax payments (net of refunds) by persons (except personal contributions for social insurance) that are not chargeable to business expense, and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes. Nontax payments include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by government.

**Distribution of money income to families and individuals.**—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Bureau of the Census has collected the data on an annual basis and published them in *Current Population Reports*, series P-60. In each of the surveys, enumerators interview representative samples of the population with respect to income received during the previous year. Money income as defined by the Bureau of the Census differs from the concept of "personal income" (see above) as defined and reported by the Bureau of Economic Analysis (BEA). Money income is income before the deduction of income taxes and social security taxes unless otherwise specified in the individual tables. *Non-money items of income*, such as wages received in kind, the value of food and fuel produced and consumed on farms, the net rental value of owner-occupied homes, the property income received by mutual life insurance companies, and the value of the services of banks and other financial intermediaries rendered to persons without the assessment of specific charges, *are not included*. None of the aggregate income concepts (gross national product, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

In 1976, the method of collecting and processing the Current Population Survey money income data for 1975 and later years was revised. Data for 1974 were reprocessed using the revised method to provide a basis of comparison with the data for 1975. Revisions to the 1974 data resulted in an *overall decrease* in the estimated number of persons living in poverty by 3.7 percent (24.3 to 23.4 million) and an increase in the estimate of median family income by .5 percent (\$12,836 to \$12,902). Differences within most subgroups, however, are more pronounced. For example, family money income for Black and other races (excluding White) increased by 3.8 percent (see tables 729 and 756).

**Poverty.**—Unless otherwise specified, poverty level statistics represent measures of *money income* and are based on a "poverty index" first developed by the Social Security Administration (SSA) in 1964 and modified by a Federal Interagency Committee in 1969. At the core of this index is the 1961 Economy Food Plan designed by the Department of Agriculture. This index, based on food consumption requirements, provides a range of income cutoffs or "poverty income thresholds" adjusted by such factors as family size, sex and age of the family head, number of children under age 18, and farm-nonfarm residence. Until 1969, annual revisions of these levels were based on price changes of items in the economy food plan. In 1969, two changes were made: (1) SSA levels for nonfarm families were retained for the base year 1963, but annual adjustments in the

levels were to be based on changes in the Consumer Price Index rather than on economy food plan costs, and (2) farm levels were raised from 70 to 85 percent of the corresponding nonfarm level.

**Individuals' saving and assets.**—The Board of Governors of the Federal Reserve System issues detailed estimates of individuals' saving as part of flow of funds accounts, showing the increase in financial assets, net investment in tangible assets, less increase in debt of individuals. Data back to 1946 are available upon request from the Federal Reserve.

**Personal and national wealth.**—Personal wealth estimates, issued by the Internal Revenue Service (IRS), are based on a sample of Federal estate tax returns which must be filed for deceased persons. Estimates are weighted to adjust for age, sex, and "social class" (as determined by IRS through insurance holdings). Gross estate is the gross value of all assets, including the full face value of life insurance (reduced by policy loans), before reduction by the amount of debts. Total assets are obtained by using the cash value of the insurance policy. Net worth is one's level of worth after all debts have been removed.

The national wealth data shown in table 777 are intended chiefly to indicate the order of magnitudes involved and to permit rough comparisons among types of wealth and of the growth over long periods. Definitions and analytical details are presented in the source publication.

**Current and constant dollars.**—Figures in a number of tables in this section are expressed in both current dollars and constant dollars. Current dollar figures reflect prices prevailing during the specified period. Constant dollar figures are computed values which eliminate the effect of price changes and are derived from prices of a specified base period. The constant dollar values are obtained by dividing current dollar values for a given period by the price indexes for the same period.

The national income and product account data are deflated to constant dollars by implicit price deflators for GNP and its components. The implicit price deflator for GNP is the ratio of GNP in current dollars to GNP in constant dollars after each of the components of GNP has been converted to base-year (i.e., 1972) prices. The money income statistics are deflated by means of the consumer price index prepared by the Bureau of Labor Statistics; see tables 792-798.

**Statistical reliability.**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

**Historical statistics.**—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

## Income, Expenditures, and Wealth

## No. 708. GROSS NATIONAL PRODUCT—SUMMARY: 1929 TO 1977

[In billions of dollars. Prior to 1960, excludes Alaska and Hawaii. See *Historical Statistics, Colonial Times to 1970*, series F 1 and F 32-70, for single-year figures prior to minor revisions issued in 1976]

| ITEM                                | 1929  | 1930    | 1933    | 1940    | 1945    | 1950    | 1955    | 1960    | 1965  |

## Income, Expenditures, and Wealth

## NO. 712. RATES OF ECONOMIC GROWTH: 1940 TO 1977

**Percent.** Figures represent average annual compounded rates of change in real gross national product, based on estimates by Department of Commerce of gross national product (expressed in constant 1972 dollars). Minus sign (-) denotes decline. To obtain annual rate of change between any 2 years shown, find column for initial year at top of table and read figure in that column opposite terminal year shown at left. See *Historical Statistics, Colonial Times to 1970*, series F 31, for single-year figures prior to minor revisions issued in 1976.

| TERMINAL<br>YEAR | INITIAL YEAR |       |      |      |      |      |      |      |      |      |      |      |      |      |      |

## No. 715. GROSS PRODUCT, BY INDUSTRY, IN CURRENT AND CONSTANT (1972) DOLLARS: 1950 TO 1976

**[In billions of dollars.]** The current-dollar data differ from national income by industry (table 721) for two reasons: (1) Non-factor charges against gross product are included; and (2) profits have been shifted from a company to an establishment basis. See *Historical Statistics, Colonial Times to 1970*, series F 130-143, for single-year figures prior to minor revisions issued in 1976]

**NO. 729. FAMILIES—PERCENT DISTRIBUTION BY MONEY INCOME LEVEL, BY RACE OF HEAD, IN CURRENT AND CONSTANT (1977) DOLLARS: 1950 TO 1977**

(Families as of March of following year. Prior to 1960, excludes Alaska and Hawaii. Based on Current Population Survey; see text, pp. 1 and 437. Beginning 1974, data not strictly comparable with earlier years due to revised procedures; see text, p. 438. Excludes inmates of institutions and Armed Forces, except Armed Forces living off post or with their families on post. Includes a small number of families with no money income. For definition of race and family, see text, p. 3. For definition of median, see p. xii. See *Historical Statistics, Colonial Times to 1970*, series G 1-8, G 16-23, G 190-192, and, for data in 1967 dollars, series G 197-199)

## NO. 732. AGGREGATE MONEY INCOME—TOTAL AND PER CAPITA, IN COUNTIES WITHIN 50 MILES OF COASTAL SHORELINES: 1959 TO 1975

[1959 and 1969 based on census data; 1975 based on money income estimates developed for Federal revenue-sharing allocations; for details, see *Current Population Reports*, series P-25, No. 649. Excludes Alaska and Hawaii. Great Lakes includes St. Lawrence River region. Covers 611 counties and independent cities which are entirely or substantially within 50 miles of the U.S. coastal shorelines listed. For population and land area of those regions, see table 7.]

| REGION          | AGGREGATE INCOME  |       |         |                 |       |       | PER CAPITA INCOME (dol.) |       |       | AGGREGATE INCOME PER SQUARE MILE (\$1,000) |       |       |

NA Not available. <sup>1</sup> For 1966-1974, base used is median income for nonfarm 4-person families. Beginning 1974 (revised), base used is median income for all 4-person families.

<sup>2</sup> Beginning 1974, not strictly comparable with earlier years due to revised procedures.

## NO. 755. WEIGHTED AVERAGE POVERTY LEVELS BASED ON MONEY INCOME FOR NONFARM FAMILIES AND INDIVIDUALS, BY SIZE OF FAMILY AND SEX OF HEAD: 1959 TO 1977

[In dollars. Excludes inmates of institutions, members of Armed Forces living in barracks, and unrelated individuals under 14 years of age. Families and unrelated individuals are classified as being above or below the poverty level, using the poverty index adopted by a Federal Interagency Committee in 1969. For explanation of poverty level, see text, p. 438. 1977 not strictly comparable with earlier years due to revised procedures]

## Income, Expenditures, and Wealth

## NO. 758. FAMILIES BELOW POVERTY LEVEL UNDER ALTERNATIVE INCOME DEFINITIONS, BY RACE, AGE OF HEAD, AND REGION: 1976

[For year ending June 30. Data measure the incidence of poverty under different income concepts. Unrelated individuals are included in these data as "one-person families." Based on data from Current Population Survey, adjusted by source for underreporting of income and nonreporting of families residing in the outlying areas and institutions. Cash transfer income includes payments for social security and railroad retirement, government pensions, unemployment insurance, workmen's and veterans' compensation, veterans' pensions, supplemental security income, and aid to families with dependent children. In-kind transfers include food stamps, child nutrition, housing assistance, medicare, and medicaid. For composition of regions, see fig. I, inside front cover]

## NO. 759. FAMILIES AND UNRELATED INDIVIDUALS BELOW POVERTY LEVEL AND AGGREGATE INCOME DEFICIT (1976 DOLLARS), BY SEX AND RACE OF HEAD: 1959 TO 1976

[As of March of following year. Income deficit defined as the difference between the total income of families and unrelated individuals below poverty level and their respective poverty thresholds. In computing the income deficit, families reporting a net income loss are assigned zero dollars; for such cases, the deficit is equal to the poverty level. For explanation of poverty level, see table 755 and text, p. 438]

## NO. 761. PERCENT DISTRIBUTION OF PERSONS RESIDING IN POVERTY AREAS, BY POVERTY STATUS AND RACE: 1970 AND 1978

[Persons' residence as of April 1970 and March 1978 respectively; poverty status based on income in 1969 and 1977, respectively. 1970 from Census of Population; 1978 from Current Population Survey. Poverty areas are those in which 20 percent or more of the population had income in 1969 below the poverty level. For definition of poverty level, see table 755 and text, p. 438. Metropolitan-nonmetropolitan status as of 1970. Metropolitan refers to 243 SMSA's as defined in 1970 census publications; see pp. 935-937, Appendix II. For further details, see source]

## NO. 762. PERSONS AND FAMILIES BELOW POVERTY LEVEL—STATES: 1959 TO 1975

[Number in thousands. Persons and families as of April 1960 and 1970, and spring 1976. For explanation of poverty level, see text, p. 438. For 1959, excludes all persons in group quarters. For 1969, excludes unrelated individuals under 14 years of age and persons in specified types of group quarters, i.e., inmates of institutions, persons in Armed Forces living in barracks, and college students living in dormitories. For 1975, same as 1969, except college students living away from home are included at their family's home. Poverty criteria computed on a national basis only and not adjusted for regional, State, or other local variations in cost of living. 1975 data from the 1976 Survey of Income and Education (SIE), a special survey mandated by Congress as part of the Education Amendments of 1974 (Public Law 93-380); based on a sample of 151,000 interviewed households; subject to sampling variability. For details, see sources.]

## NO. 775. PERSONAL WEALTH—VALUE OF ASSETS HELD BY ALL PERSONS, TOP ONE-HALF PERCENT, AND TOP ONE PERCENT: 1958 TO 1972

[In billions of dollars, except as indicated. Wealth of all persons derived from national balance sheets. Wealth of top one-half percent and one percent of all persons estimated by estate multiplier technique. Detailed descriptions of methodology and attendant problems can be found in sources cited for table 774]

NA Not available. X Not applicable. <sup>1</sup> Market value without deduction of mortgages, liens, or other encumbrances. Beginning 1962, includes foreign real estate. <sup>2</sup> Includes all common and preferred issues, shares in domestic or foreign firms, certificates and shares of building and loan and savings and loan associations, Federal land bank stock, accrued dividends, and other instruments representing equity interest in an enterprise. Stock held in trust is included, but value is understated. <sup>3</sup> Includes checking and savings balances, currency on hand or in safe deposit boxes, cash balances with stock brokers, and postal savings accounts. Cash in trust is included, but understated. <sup>4</sup> Includes notes and mortgages, security credit, and similar assets. <sup>5</sup> Cash surrender value; i.e., the amount individuals could expect to receive were they to surrender their policies to the carriers. It takes account of policy loans, accrued dividends, and unearned premiums. <sup>6</sup> Includes all assets owned in trust except real estate. Trust classification figures should not be used to arrive at total assets because these data are included in individual asset types. <sup>7</sup> Includes all legal obligations except loans on life insurance policies.

<sup>1</sup> Estimates derived by "perpetual inventory" method which is intended to reflect reproduction cost of different types of assets. Estimates are obtained by: (a) reducing each year's gross capital expenditures in current prices to 1958 price level by means of the appropriate construction cost index; (b) depreciating gross capital expenditures in accordance with an assumed length of life for different types of assets, thus obtaining net capital expenditures for each year in 1958 prices; (c) cumulating net capital expenditures for as many years backwards as corresponds to the assured length of life of the type of asset involved. <sup>2</sup> Owner occupied only. <sup>3</sup> Current dollar estimates are based on book values; constant dollar estimates reflect book values reduced by means of wholesale price indexes. <sup>4</sup> Includes business and household inventories. <sup>5</sup> Private farm land estimates are based on census or similar data. Private nonfarm land estimates are derived by application of rough ratios of land to structure values for different types of real estate. Excludes subsoil assets.

## NO. 780. FIXED NONRESIDENTIAL BUSINESS CAPITAL—COST VALUATION IN CURRENT AND CONSTANT (1972) DOLLARS: 1950 TO 1977

In billions of dollars. Stocks as of Dec. 31; depreciation over entire calendar year. Data refer to privately owned assets and are based on the fixed capital formation components of the gross national product. Excludes owner occupied nonfarm and farm residential capital and government enterprises; includes nonprofit institutions. Gross stocks allow for retirement, net stocks allow for retirement and depreciation. Estimates are based on straight-line depreciation and 88 percent of service lives given in *Bulletin F*, Internal Revenue Service. For single-year figures prior to minor revisions issued in 1976 and data in constant (1968) dollars, see *Historical Statistics of the United States, Colonial Times to 1970*, series F 480-527.

<sup>1</sup> For gross and net stocks, constant dollar data tend to be lower than current dollar data. Implicit price deflator is set equal to 1 at midpoint of year; due to inflation during last six months of 1972, implicit price deflator applied to stocks at year-end was greater than 1. Depreciation is considered to occur evenly throughout calendar year, and is deflated at midpoint of year. <sup>2</sup> Includes farm, not shown separately.

## Section 15

### Prices

This section presents indexes of producer and consumer prices, actual prices for selected commodities, and budgets for urban families and retired couples. The primary sources of these data are monthly publications of the Department of Labor, Bureau of Labor Statistics, which include: *Monthly Labor Review*; *Consumer Price Index*; *Estimated Retail Food Prices by Cities*; *Retail Prices and Indexes of Fuels and Utilities*; and *Producer (formerly Wholesale) Prices and Price Indexes*. The Bureau of Economic Analysis of the Department of Commerce is the source for the gross national product (GNP) implicit price deflator figures; see table 783. The Department of Agriculture's Economics, Statistics, and Cooperatives Service (ESCS) prepared indexes of prices received and prices paid by farmers; see section 24.

The Bureau of Labor Statistics prepares monthly indexes of producer prices for a large selection of commodities; monthly indexes of consumer prices for both commodities and services; and weekly indexes of spot market prices for 22 commodities. The single year 1967 is currently the standard reference base period for most general purpose index numbers prepared by Federal agencies.

**Producer price index.**—This index (formerly the wholesale price index), dating from 1890, is the oldest continuous statistical series published by the Bureau of Labor Statistics. It is designed to measure average changes in prices of all commodities, at all stages of processing, produced or imported for sale in primary markets in the United States.

The index has undergone several revisions (see *Monthly Labor Review*, February 1962). It is now based on approximately 2,800 commodity price series instead of the approximately 1,900 included in the 1947-60 period and the 900 included for the period prior to 1947. Prices used in constructing the index are collected from sellers, if possible, and generally apply to the first significant large-volume commercial transaction for each commodity—i.e., the manufacturer's or other producer's selling price, the importer's selling price, or the selling price on an organized exchange or at a central market.

The weights used in the index represent the total net selling value of commodities produced or processed in this country, or imported. The values are f.o.b. production point and are exclusive of excise taxes, interplant transfers, military products, and goods sold directly at retail from producing establishments. Effective January 1976, the weights are values of net shipments of commodities as derived from the industrial censuses of 1972 and other data. From January 1967 through 1975, weights were based on 1963 shipment values.

**Consumer price index (CPI).**—This index measures the average changes in the cost of a fixed, or constant, "market basket" of consumer goods and services purchased by urban wage earners and clerical workers (45 percent of the civilian noninstitutional population); see below, however, for change beginning 1978. Weights which reflect the relative importance of the components of the index (e.g. housing, food, entertainment) and which are used in calculating the index are based on studies of actual expenditures by consumers. Quantities and qualities of items in the "market basket" remain essentially the same between consecutive pricing periods (monthly for national data), so that the index measures the effect of *price change only* on the cost of living. It does not measure changes in the total amount families spend for living; geographic area indexes do not measure relative differences in prices or living costs between areas.

A study conducted during 1917-19 provided the composition of the "market basket" and the weights used until 1935. Since then, this index has undergone several major revisions which involved bringing the "market basket" of goods and services up to date,

revising the weights, and improving the sample and methodology. The fourth revision, which is shown in this section and which was incorporated in a new series beginning in 1964, introduced expenditure weights relating to 1960-1961. The most recent revision, issued beginning January 1978, is based on an updated "market basket" of goods and services and revised expenditure weights relating to 1971-1972. This revision also establishes a second CPI index representing all urban consumers (80 percent of the civilian noninstitutional population). For a discussion of the history and concepts of the CPI, see *Consumer Price Index*, report number 517, published by the BLS.

The list of items priced for the index (prior to 1978) includes approximately 400 goods and services. The items priced are described by detailed specifications to insure that, as far as possible, the same quality is priced each time, and that differences in reported prices are measures of price change only. All taxes directly associated with the purchase or continued use of the items priced are included in the index.

The national index for the fourth revision of the CPI, which is shown in this section, is based on prices collected in 56 areas. These include the urban portions of 37 standard metropolitan statistical areas (SMSA's), the more extensive standard consolidated areas for Chicago and New York-Northeastern New Jersey; and 17 nonmetropolitan urban places. (See text, page 2, for explanation of the SMSA concept.) Area definitions are those established for the 1960 census and do not include any subsequent revisions. Foods, fuels, and a few other items are priced monthly in all areas. Prices of most other goods and services are obtained monthly in the 5 largest areas and every 3 months in other areas. Rents are surveyed bimonthly in the 5 largest areas and every 3 months in other areas. Between scheduled survey dates, prices are held at the level of their last pricing for all goods and services except new automobiles. Price data for the 56 areas are combined for the United States with weights based on 1960 population of the several areas represented by each sample area. Indexes are published for areas grouped by size of city and by region of the country, and for 23 separate metropolitan areas.

Food price indexes are computed as a subgroup of the consumer price index. The indexes have been computed from prices of 60 foods from 1950-52, 90 foods from 1953-63, and 96 foods beginning January 1964.

**Statistical reliability.**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to the Producer Price Index and the CPI, see Appendix III.

**Historical statistics.**—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

#### NO. 781. PURCHASING POWER OF THE DOLLAR: 1940 TO 1978

[1967=\$1.00. Producer prices prior to 1961, and consumer prices prior to 1964, exclude Alaska and Hawaii. Obtained by dividing the average price index for the 1967 base period (100.0) by the price index for a given period and expressing the result in dollars and cents]

## NO. 789. AVERAGE PRICES (UNIT VALUES)—SELECTED COMMODITIES EXPORTED AND IMPORTED: 1965 TO 1977

[In dollars per unit. Includes trade of Puerto Rico with foreign countries. Unit values obtained by dividing annual values of domestic exports and of imports by annual quantities. Values of goods exported represent those at port of export. Values of goods imported, 1965 to 1973, represent market values in country from which imported; thereafter, transaction values f.a.s. (free alongside ship) at port of export. Unit values may show actual price movements only roughly for commodities subject to considerable price variations among different grades, methods of packing, etc., and to year-to-year variations in proportions of grades, etc. Unit values of agricultural exports also include effects of Commodity Credit Corporation sales for export]

## No. 790. IMPORT PRICE INDEXES—SELECTED COMMODITIES: 1970 TO 1978

[Products classified and weighted by Tariff Schedule of the United States Annotated, a scheme for describing and reporting product composition and value of U.S. imports. Import prices are based on U.S. dollar prices paid by importer. Prices are f.o.b. (free on board) foreign port or c.i.f. (cost, insurance, and freight) U.S. port transaction prices, as indicated. Additional index series are available for the period after 1974]

NA. Not available. <sup>1</sup> Includes veneered panels. <sup>2</sup> For making or breaking or for protecting electric circuits. <sup>3</sup> Excludes motorized cycles. <sup>4</sup> Excludes knitted or crocheted.

## No. 791. EXPORT PRICE INDEXES—SELECTED COMMODITIES: 1970 TO 1978

[1967=100, except as indicated. Indexes are weighted by 1975 export values according to Schedule B classification system of U.S. Bureau of the Census. Prices used in these indexes were collected from a sample of U.S. manufacturers of exports and are f.o.b. (free on board) factory transaction prices, except as noted. Additional index series are available for the period after 1974]

## Prices

## No. 792. CONSUMER PRICE INDEXES, BY MAJOR GROUPS: 1950 TO 1978

[1967=100. Annual averages of monthly figures. Prior to 1965, excludes Alaska and Hawaii. Beginning 1965, except as indicated in text, p. 482, for 1978, indexes reflect buying patterns of urban wage earners and clerical workers in the 1960's, including single workers living alone as well as families of two or more persons; indexes for prior years apply only to families of two or more persons. See also *Historical Statistics, Colonial Times to 1970*, series E 135-173]

| YEAR      | All items | Food  | Rent, residential | Home ownership | Household appliances <sup>1</sup> | Fuel oil and coal | Gas and electricity | Apparel and upkeep | TRANSPORTATION |        | Medical care | All commodities | All services |

NO. 797. URBAN BUDGETS FOR A 4-PERSON FAMILY AND FOR A RETIRED COUPLE:  
1967 TO 1977

[In dollars. 4-person family refers to annual living costs for a family comprising a 38-year-old employed husband, a wife not employed outside the home, an 8-year-old girl, and a 13-year-old boy. Retired couple refers to a retired husband 65 years old or over and his wife. The 3 budget levels reflect costs of different specified types and amounts of goods and services. Each level provides for average inventories of clothing, housefurnishings, major durables, and other equipment. Metropolitan areas are as defined in May 1967.]

<sup>1</sup> Not intended to represent a minimum or subsistence level.<sup>2</sup> For definition, see U.S. Office of Management and Budget, *Standard Metropolitan Statistical Areas, 1967*.<sup>3</sup> Places with 2,500-50,000 population in 1960. <sup>4</sup> Includes the weighted average cost of renter and homeowner shelter, housefurnishings, and household operations. Four-person families in the lower budget are assumed to be renters. A small allowance for lodging away from home city is included in the higher budget. <sup>5</sup> Includes gifts, contributions, life insurance, and occupational expenses. <sup>6</sup> Includes gifts and contributions and, at the higher level, an allowance for life insurance and, for 1967-1972, personal income taxes.Source: U.S. Bureau of Labor Statistics, *3 Budgets for an Urban Family of Four Persons, 1969-70; Autumn Urban Family Budgets and Comparative Indexes for Selected Urban Areas*, annual (Supplements to Bulletin 1570-5); *3 Budgets for a Retired Couple in Urban Areas of the United States, 1969-70*; and *3 Budgets for a Retired Couple, Autumn*, annual. (Supplements to Bulletin 1570-6).

**No. 798. URBAN INTERMEDIATE BUDGET FOR A 4-PERSON FAMILY AND A RETIRED COUPLE—U.S. COST, 1967 TO 1977, AND FOR SELECTED METROPOLITAN AREAS, 1977**

[In dollars, except percent. See headnote, table 797. Metropolitan areas are as defined in May 1967]

# Retail Prices

497

## NO. 801. AVERAGE RETAIL PRICES OF SELECTED FOODS: 1965 TO 1978

**[In cents per pound, except as indicated.** Represents averages of prices reported by retail dealers in cities included in the Retail Food Index. Data are estimated averages of prices reported by retail dealers. Number of cities varies according to the number of cities in which an item was priced and the availability of prices within the cities. Excludes sales taxes. Prices for individual cities combined on basis of population weights. See also *Historical Statistics, Colonial Times to 1970*, series E 187-202.]

## Section 16

### Elections

This section relates primarily to Presidential, congressional, and gubernatorial elections. Also presented are summary tables on congressional legislation, population of voting age, voter participation, and campaign expenditures.

Official statistics on Federal elections are collected by the Clerk of the House of Representatives and published biennially in *Statistics of the Presidential and Congressional Election* and *Statistics of the Congressional Election*. Federal and State election statistics appear also in *America Votes*, issued biennially by the Elections Research Center, Washington, D.C.; and data on Federal elections appear in the U.S. Congress, *Congressional Directory*, and in official State documents. Data on voter eligibility and participation are obtained by the U.S. Bureau of the Census as part of the Current Population Survey (CPS) and are published in *Current Population Reports*, series P-20 and P-25 (see text, p. 1).

Almost all Federal, State, and local governmental units in the United States conduct elections at various intervals for different offices and other purposes. The conduct of elections is regulated by State laws or, in some cities and counties, by local charter. An exception is that the U.S. Constitution prescribes the basis of representation in Congress and the manner of electing the President, and grants to Congress the right to regulate the times, places, and manner of electing Federal officers. Amendments to the Constitution have prescribed conditions for voting eligibility. The 15th Amendment, adopted in 1870, gave all citizens the right to vote regardless of race or previous condition of servitude. In 1920, women were given the right to vote by the 19th Amendment. The payment of poll taxes as a prerequisite to voting in Federal elections was banned by the 24th Amendment in 1964. In 1971, as a result of the 26th Amendment, eligibility to vote in national elections was extended to all citizens, age 18 and over.

**Presidential election.**—The Constitution specifies how the President and Vice President are selected. Each State elects, by popular vote, a group of electors equal in number to its total of Representatives and Senators. The electors meet in their respective States subsequent to the election to cast their ballots for President and Vice President. Usually, an elector votes for the candidate with the most popular votes. A majority vote of the entire number of electors is necessary to elect the President and Vice President. If no candidate receives a majority, the House of Representatives, with each State having one vote, is empowered to elect the President and Vice President, again, with a majority of votes required.

The 22d Amendment to the Constitution, adopted in 1951, limits presidential tenure to 2 elective terms of 4 years each, or to 1 elective term for any person who, upon succession to the Presidency, has held the office or acted as President for more than 2 years. The 23d Amendment, adopted in 1961, grants the District of Columbia 3 presidential electors, a number equal to that of the least populous State.

**Congressional election.**—The Constitution provides that Representatives be apportioned among the States according to their population; that a census of population be taken every 10 years as a basis for apportionment; and that each State have at least 1 Representative. At the time of each apportionment, Congress decides what the total number of Representatives will be. Since 1912, the total has been 435, except during 1960 to 1962 when it increased to 437 to accommodate granting 1 Representative each to Alaska and Hawaii. The total reverted to 435 after reapportionment following the 1960 census. Members are elected for 2-year terms, all terms covering the same period.

The Senate is composed of 100 members, 2 from each State, who are elected to serve for a term of 6 years. One-third of the Senate is elected every 2 years. Senators were

originally chosen by the State legislatures. The 17th Amendment to the Constitution, adopted in 1913, prescribed that Senators be elected by popular vote.

**Voter eligibility and participation.**—The Census Bureau publishes estimates of the population of voting age and the percent casting votes in each State for Presidential and congressional election years. Voting-age population estimates include a number of persons who meet the age requirement but are not eligible to vote (e.g., aliens and institutionalized persons). It was estimated that, in November 1978, 4,000,000 aliens and 500,000 institutionalized persons were part of the voting-age population. Since 1964, voter participation and voter characteristics data based on the CPS (see above) conducted during November of election years have also been issued biennially.

**Statistical reliability.**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Historical statistics.**—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix I.

#### No. 810. VOTE CAST FOR PRESIDENT, BY POLITICAL PARTIES: 1920 TO 1976

[Prior to 1960, excludes Alaska and Hawaii. Vote cast for major party candidates includes the votes of minor parties cast for those candidates. See also *Historical Statistics, Colonial Times to 1970*, series Y 79-83 and Y 135]

## Elections

## NO. 819. APPORTIONMENT OF MEMBERSHIP IN HOUSE OF REPRESENTATIVES, BY STATES: 1790 TO 1970

[Total membership includes Representatives assigned to newly admitted States after the apportionment acts. Population figures used for apportionment purposes are those determined for States by each decennial census. No reapportionment based on 1920 population census. For method of calculating apportionment and a short history of apportionment, see House Report 91-1314, 91st Congress, 2d session, *The Decennial Population Census and Congressional Apportionment*. See also *Historical Statistics, Colonial Times to 1970*, series Y 220-271]

**No. 821. VOTE CAST FOR UNITED STATES REPRESENTATIVES, BY MAJOR POLITICAL PARTIES, BY STATES: 1972 TO 1976**

[In thousands, except percent. In each State, totals represent the sum of votes cast in each Congressional District, except as follows: In Alaska, Delaware, Nevada, Vermont, and Wyoming, only 1 Representative was elected for the State at large. In numerous States, one or other of the major parties had no candidate in some districts. In those cases where votes of a party as such are cast in endorsement of a candidate of another party, votes are counted as for the endorsing party. See also footnotes below. See also *Historical Statistics, Colonial Times to 1970*, series Y 211-214]

## Elections

No. 832. COMPOSITION OF STATE LEGISLATURES, BY POLITICAL PARTY AFFILIATIONS:  
1972 TO 1976

[Dates shown refer to election years in most States, to odd-year elections a year previously in a few; figures reflect immediate results of elections, including holdover members in partial renewal situations. Dem.=Democratic; Rep.=Republican. In general, Lower House refers to body consisting of State Representatives; Upper House, of State Senators]

**NO. 836. PARTICIPATION IN PRESIDENTIAL ELECTIONS, BY POPULATION CHARACTERISTICS: 1968 TO 1976**

[As of November. Covers civilian noninstitutional population, 18 years old and over, except for 1968, 21 years old and over (see also footnote 1, table 835). Includes aliens. Figures are based on a population sample (see text, p. 1) and differ from those in tables 835 and 841 based on population estimates and official vote counts. Differences in percentages may also be due to overreporting of voting (reluctance of some persons in the sample who actually did not vote to so report)]

## NO. 844. CONGRESSIONAL CAMPAIGN FINANCES—ADJUSTED RECEIPTS AND EXPENDITURES: 1975-1976

[Covers all campaign finance activity during Jan. 1, 1975–Dec. 31, 1976 for primaries and general elections. Relates to 860 candidates for House of Representatives who received 5 percent or more of the votes in the General Election and to 64 candidates for the Senate. Data adjusted to exclude refunds, rebates, returned contributions, loan repayments, treasury notes, and certificates of deposits which were bought and redeemed]

## NO. 846. ELECTION CAMPAIGN COSTS FOR NATIONAL OFFICES: 1972

[Covers some prenomination expenditures. Data are provided by the U.S. General Accounting Office, Office of Federal Elections (O.F.E.), created to administer the Federal Elections Campaign Act of 1971, effective as of April 7, 1972. Previously, only committees operating in two or more States were required to report receipts and expenditures. In 1968 there were 222 such committees, not all of which contributed to Presidential campaign. The new requirement of comprehensive disclosure resulted in 1,785 committees filing reports with the O.F.E. in 1972, all of which contributed in some way, but not exclusively to a Presidential candidate. Except for congressional spending, all other figures are from the O.F.E.]
